WARRANT FOR TOWN MEETING
STATE OF NEW HAMPSHIRE

To the Inhabitants of the Town of Rollinsford in the County of Strafford, in said State, qualified to vote in town affairs:

You are hereby notified to meet at Town Hall in said town the tenth day of March, 1931, at ten (10) o'clock in the forenoon, to act upon the following subjects:

Article 1. To bring in your ballots for Town Clerk, Town Treasurer, one Selectman for a term of three years, one Road Agent and Chief of Fire Department.

Art. 2. To choose all other necessary town officers for ensuing year.

Art. 3. To raise such sums of money as may be necessary to defray town charges for ensuing year.

Art. 4. To see what percentage, if any, the town will vote to discount all taxes paid on or before the first of August next.

Art. 5. To see if the town will vote to establish a Public Library and accept the provisions of Chapter 8, Section 21-26 of the Public Statutes and appropriate a sum of money for the same.

Art. 6. To see if the town will vote to give a prescription permit to any druggist, who is a registered pharmacist doing business in town, to sell liquor for medicinal use under Section 14, Chapter 147 of the Laws of the January session, 1917, approved April 17, 1917.

Art. 7. To see if the town will vote to raise and appropriate the sum of three hundred and fifty dollars ($350.00) to purchase hose for Chemical Hose Co. No. 3 of said town.

Art. 8. To see if the town will vote to raise and appropriate the sum of twenty-five dollars ($25.00) for the purpose of installing an electric light on the South side of South Street near steps and walk leading to Christ Episcopal Church.

By Petition.

Art. 9. To see if the town will vote to raise and appropriate a sum of money for the purpose of installing four (4) hydrants, to be located as follows:

One at the corner of Willey and Locust Streets.
One at the corner of Willey and Prospect Streets.
One at the corner of Pine and Foundry Streets.
One at the corner of Prospect and West South Streets.

By Petition.

Art. 10. To see if the town will vote to maintain a District Nurse and to raise money for the same.

Art. 11. To transact any further business that may legally come before said meeting.

Given under our hands and seal, this twentieth day of February, 1931.

Joseph C. Roberts,
Edward J. Hudon,
Forrest L. Nutter,

Selectmen of Rollinsford.

Appropriations will begin at 11 o'clock sharp.

REPORT OF CHIEF ENGINEER AND FOREST FIRE WARDEN

To the People of Rollinsford:

We solicit your cooperation for service. Fire prevention should be practised. Fire preparedness is an acknowledged necessity. Keep Prepared.

We are all human and prove to error; but if we do the best we can, struggling at all times efficiently there should be light ahead.

While it is our privilege to report an exceptionally small fire loss for the year 1930, considering the number of alarms, it is my desire to assure you that this small loss was made possible by the cooperation of the taxpayers by preparing their fire department with the necessary appliances to properly fight fires when the occasion demanded. Fire prevention is the watchword, Preparedness the Last Word.

The year 1930 has been exceptionally outstanding considering the past, in the elimination of fire hazards, and especially so in the village district. The town officials, in cooperation with our industrial concerns and the individual citizen, have exerted themselves to keep the village district clean by the weekly removal of refuse thereby doing away with fire hazards and practising the watchword—"PREVENTION".

The officials of The Tire Fabric Corporation are to be congratulated for the fine appearance of their tenement property. Their houses have been repaired and painted and all the chimneys of their tenements have been thoroughly cleaned inside and out to the extent that chimney fires in these tenements should be a thing of the past. It is work well done in the elimination of fire hazards to

their property as well as beautifying the town in respect to cleanliness. This concern has started something in which the village property owners are extending cooperation.

The Tire Fabric Coperation is leading the way and the townspeople are very agreeably cooperating to the admiration and delight of our many visitors. The elimination of fire hazards is a step in the right direction and means dollars in the pocket books of our tax-payers. Keep the ball rolling so that all may participate in the good work during future years.

I congratulate the Selectmen and the Townspeople in general through their efforts, for the new fireproof roof on our town hall, also for the neat appearance of the whole building which was made commendably attractive by two coats of paint. Your Town Hall roof, so far as fire is concerned from the outside, may be entirely forgotten for years to come due to the fireproof asbestos shingles placed thereon. Another bad fire hazard removed from our list.

The new fire hydrant placed at the junction of Highland Ave. and Dover Street, by the city of Dover at this town's expense during the past year will be greatly appreciated in time of fire in that locality by the many residents and should prove a great time saver for protection by your fire department should the occasion demand its use. More protection of the same nature should be advocated.

The cooperation of neighboring city and town fire departments during 1930 could not be improved. About one fourth of our alarms for 1930 have been calls for out of town assistance, which goes to show that such cooperation can only exist through preparedness.

Dump fires the past year have proven a nuisance to residents in the locality of the dump. Do not dump hot ashes on a dump knowingly. Have some consideration for the people that must suffer from the sickening smoke from

such a fire. These fires can be eliminated if proper precaution is exercised. Let's be Cautious.

Many times the past year your fire department has been asked to burn fields of uncut hay. In each case our answer has been a positive refusal. Hay fields should be cut in season to eliminate the fire risk later. These uncut hay fields are the worst kind of fire hazards and should be properly taken care of in season or before they become a fire risk. Cut your Hay Fields.

We have this past year added to our fire fighting equipment 12 fire brooms, six 12-quart sprinklers, 4 water pails and four 2½ gallon size hand chemical extinguishers are carried on the truck at all times and can be used at any and all fires. We now carry 6 pony chemicals on the truck in place of 2 formerly. There has also been added a complete and well stocked first aid kit for the convenience of injured firemen or others needing attention at a fire.

We have had installed in the fire station a new side wall double decked hose dryer at an approximate cost of $84.00. It is now possible to lay out, wash, and dry hose, in a warm room upon returning from a fire. The life of our fire hose will be greatly advanced by properly cleaning and drying same before rolling for storage or replacement on truck.

I SUGGEST AND RECOMMEND

The salary of Chief Engineer be increased from $50.00 to $100.00 per year. The position of Chief Engineer is one of the most responsible of all town officers and should be properly and accordingly paid as such.

Having our fire truck properly insured, it would cost the town about $50.00 public liability, and about $58.00 property damage with limits of from $5,000.00 to $10,000.00 for public liability, or a total premium of about $108.00 per year for property damage and public liability on from $5,000.00 to $10,000.00 insurance. It's a business proposition and ought to be considered so and adopted.

Using proper incenerators when burning waste paper and refuse around buildings, protect your own property as well as others, by adopting this method of necessary burning.

Turning old fire hose, unfit for fire or pump service, over to road commissioner to be used and cared for by him for the purpose of sewer flushing, etc. We have on hand some three or four hundred feet of hose quite unfit for fire purposes which might be used to good advantage on sewer work.

The Chief Engineer be instructed to purchase 400 feet of new double jacket fire hose to replace old and unserviceable hose, which could be used to good advantage by Road Commissioner on sewer work, and the town raise an appropriate $350.00 for said new hose.

Cleaning chimneys and stove funnels at least twice a year. Many of the larger fires are caused from overheated chimneys and stove funnels. This hazard can be practically eliminated by keeping chimneys and funnels clean. Try it and be convinced.

The fire department budget for 1931 should be the same as for 1930 or $850.00 plus $50.00 increase in Chief Engineer's salary and a special appropriation of $350.40 for new fire hose. Please give this suggestion and recommendation your earnest support if you sincerely believe in fire department preparedness.

Obtaining your permit to kindle a fire and thereby keeping within the law.

Mr. Taxpayer: Don't knowingly commit perjury. Is your fire department what it ought to be? What are you going to do to help make it what it should be? Your home and its contents are worth protection from fire. Your fire protection, through your fire department, is just what you make it. Carelessness breeds neglect. Don't neglect your fire protection. You are the doctor. It's up to you.

Always on the job, day or night, like a watch dog, ex-

pectant of the scent. Your fire department in cooperation with your town officials and the individual citizen have answered every alarm responding to the town's welfare, as well as the alarms of our neighboring cities and towns with a spirit of tried cooperation between fire departments true to the hazards of saving life and property ask only that we be judged as you would have your fire protection administered by the proper credentials of protection.

FOREST FIRE WARDEN'S REPORT

We all know or should know that the grass and brush fire season of 1930 was among the worst on record. Without glossing some of the bad points which undoubtedly contributed to the serious results of the year's fires it is fair and just to tell you that the results of the fire season as a whole were not discreditable to the forest fire organization. Fires in tremendous numbers were fought with determination without benefit of rain and extinguished in spite of severe drought. The standard achieved during the year was well up to the average of previous seasons.

As an organization, we do not resent criticism if it is just and constructive. We feel we can profit from such judgments when they are addressed to us in a spirit of helpful cooperation. In order to consider troublesome problems which call for remedial measures, let us take them in the order (1) large number of fires; (2) large areas burned; (3) damage, and (4) high cost of fire fighting.

(1). *Large number of fires*:—At a time when many fires were occuring, requests from everywhere in the state were received asking that the Governor proclaim the woodlands closed. This meant keeping fishermen out of the woods, among others. These fishermen fought the proposal with the assertion that while some fires were undoubtedly being caused by fishermen, more fires were being caused by brush burning; for example—and there was some justice in the allegation. The facts are that 139 fires out of the 571 spring fires in 1930 (excluding railroad fires) were caused by fires kindled to burn brush. One fire out of each five we had was thus deliberately kindled, in many cases with the permission of the warden. These burned nearly 5 square miles and caused nearly 25% of

all the damage we suffered. This record is unusually bad but the records of other years have also been bad enough to prove that brush burning in the spring is dangerous at best and that future safety from fire in this connection depends entirely on a different attitude we must take toward the problem.

Whereas it has been the policy to suspend the issuance of permits only when the ban was in effect, the general adoption of a new plan is required. Permits will be granted in the future only for necessary fires, the kindling of which will occur only during or after heavy rains so as to insure absolute freedom from fire danger. In the meantime, we should encourage the doing of as much winter burning as possible.

Careless smoking was the most prolific cause of fires. Against this and other dangerous fire hazards, we can only strive to educate the public by posting notices wherever necessary and in the other ways available to us.

(2) *Large area burned*:—Some fires burned extremely large areas, quite out of proportion to the area of the average fire. Primary causes of these large burned areas are the lack of adequate patrol after fires are once controlled and the lack of suitable fire fighting equipment in sufficient quantities. The matter of suitable fire fighting equipment is well understood by the wardens.

(3) *Damage*:—During the spring of 1930, damage to buildings and other forms of improved property accounted for more than one-third of all damage caused by forest fires. It seems to be true that much of the kindling of fires to burn brush, debris and rubbish of all sorts is done where such fires escaping control spread to improved property, inflicting comparatively heavy damage. This phase of the fire question will be settled largely by a proper regulation of brush and debris burning.

(4) *High cost of fire fighting*:—Reasonable judgment in calling out crews to fight fire is absolutely necessary if fires are to be fought successfully and at a reasonable cost. The crews as called out should be equipped with tools to cope with ordinary fires.

The outstanding spring fire hazard today seems to be grassland. When one considers that 40% of our fires last spring started in and were confined to grass lands, and that burned grasslands constitute 30% of the total burned area, it is easy to realize the magnitude of the problem. Here in Rollinsford, as elsewhere throughout the state, uncut grasslands are piling up a seriously large area total. When such uncut fields adjoin travelled roads on one side and woodland or improved property on other sides, hazard and risk are great and governed largely by the quantity of traffic passing by or through the areas. This is a serious condition for which a remedy must be found.

One thing seems sure and that is the need of restriction in future spring periods of fires kindled to burn brush, grass and debris. The experience of last spring confirms the experience of the past that this kind of burning in the spring is dangerous at best and practically unpermissable nowadays.

Our town has been very fortunate during the year of 1930 by escaping grass and brush fires whereby any costly damage has resulted either to the state, town or property owner. We have responded to ten or more grass or brush fires the past year and are very pleased to say that no serious damage has resulted from any of these fires. Two of these fires were kindled by persons holding permits from the Fire Warden and neither of the two fires proved costly after getting beyond control of the party holding said permit. The other eight or more grass or brush fires were kindled by unavoidable or unknown causes. Therefore let me impress upon everybody desiring to kindle a fire at any and all seasons of the year to obtain the necessary

permit from the Forest Fire Warden before kindling the fire. Also let me inform you that a fire permit to kindle a fire in 1931 and future years is going to be very hard to obtain and will be granted only when the weather and the cause for burning are very favorable in the opinion of the Fire Warden.

In conclusion, it is my desire, in behalf of the Rollinsford Fire Department, to thank one and all for the wonderful cooperation received in the past. A continuance of that loyal support is solicited for the future so that your fire protection may be made better than ever before.

Respectfully submitted in behalf of the Rollinsford Fire Department.

RAYMOND C. CHASE, *Chief Engineer*

Forest Fire Warden.

ALARMS FOR FIRE

Call No. 4. Location, Salmon Falls Cafe; description, bed afire; date, Feb. 6th, 1930.

Call No. 3. Louise Goodwin Farm; grass fire; Mar. 6.

Call No. 3. Somersworth Road; grass fire; Mar. 13.

Call No. 4. Tire Fabric Corp. tenement; chimney; Mar. 14.

REPORT OF SUPERINTENDENT OF SCHOOLS ROLLINSFORD, N. H.

To the School Board and Citizens of Rollinsford:

This is the third report which I have had the privilege of presenting. I wish to make it informative in order that the community at large may know what we are doing.

Teachers and Instruction

There has been no change in the teaching force, and there is a feeling of confidence in the corps. The State Program of Studies has been used as a basis of our work for many years and the revised program just completed is now in operation. Monthly meetings of the teachers are being held and the program discussed subject by subject. We are constantly trying to improve the instruction. Some objective tests are given by which we try to measure the progress of our pupils with those elsewhere in the state and nation. The course in reading introduced into the Franklin school last year is proving successful.

We were fortunate in securing a teacher for both art and music only to lose her to Laconia where she secured a full time position. In January, Miss Helen Lesiuk, a graduate of Salem, Mass. High School and the New England Conservatory of Music, took up the work of music. She will give a public musical entertainment later, possibly in connection with the graduation. It is hard to keep a music teacher because we can employ one only a small part of the time.

The report of the nurse, Mrs. Deborah Benedict, accompanies this report. I have only words of praise for the results that our nurses obtain. They are a great help to our teachers.

Repairs

Twice during the year we have been called upon to make repairs at the Pearyard school after entrance to the building had been forced. I recommend that a new floor be laid in this building. The old one is badly worn and loose. If a new floor could be laid over the old one it would add much warmth and save coal. Approximately one hundred dollars would meet the necessary expense. When the painting is completed at the Sullivan school that will be a model one room building.

The amount of money available for repairs at the Franklin school was not enough to do much to the interior, since so much had to be spent on the outside. The primary room was refinished this year, and new seats provided. At least one other room should receive similar treatment the coming summer and window shades should be provided throughout the building. A $1,000 could be well spent in this building in providing proper window lighting.

Finances

Dover raised the high school tuition to $100 per year. Notice was not given the school board until after the annual meeting, therefore the appropriation made did not meet the needs. We have operated on a minimum budget and outside of repairs and tuition, costs have remained practically the same. The equalized valuation has been increased and no state aid will be granted next year.

Other Recommendations

I believe that our next progressive step should be the introduction of Manual and Domestic Arts. These could be introduced at small cost since we have plenty of room in the town hall. An appropriation of $600 should defray expenses for both installation and teaching.

Satistics

A comparison of statistics will show little variation from last year. Schools were in session 173 days, compared with 171.5 the year before. Tuition is being paid for 17 pupils at Berwick Academy and for 28 at Dover High School. Eleven pupils were graduated from the eighth grade compared with twenty-four the year previous. Six of the graduates entered high school, compared with fifteen in 1929. Attendance has been good with very little sickness.

Visits of Board Members	29	53
Visits of Superintendent	315	266
Visits of Citizens	249	271

Thanks are given the American Legion for their gift of $5.00 to the pupil of the graduating class of 1930 who ob-

tained the highest rank. This was awarded to Gladys Pease. Anita Earl was presented the Citizenship medal given by the Sons of the American Revolution.

I wish to thank the citizens for their continued cooperation and the School Board for their loyal support of me and our teachers.

Respectfully submitted,

HOWARD L. WINSLOW,

Superintendent of Schools.

REPORT OF SCHOOL NURSE

To Superintendent and Members of School Board:

I herewith submit my report of work done during October, November and December of 1930.

Number of pupils examined	257
Treatments in schools	18
Treatments in homes	3
Visits to schools	42
Visits to homes	37
Children accompanied to Doctor	1
Children accompanied to Oculist	24
Treatments secured	26
Number of children excluded on account of contagious or suspected illness	8

I would thank the teachers for their keen interest and ready assistance in the children's welfare. I wish to thank the local Red Cross who had anticipated the need and have so generously given financial aid to the care of 18 local children with poor vision. We are indebted to Doctor Flanders who donated his time for the examination of these children, charging only for the actual cost of work done. It is not to be assumed that all glasses secured were paid for in this way, for the eight other children with poor vision were taken care of by their parents. This cooperation of the parents is sincerely appreciated.

Now that the poor vision is as well taken care of I hope with the continued cooperation of the parents to keep our children healthy. Health for the community is health, abundant health, for the children. It is true that health

is the goal for all, but health for the children is the chief goal of your public health nurse.

Respectfully submitted,

Deborah B. Benedict, R. N.

ROLLINSFORD SCHOOL DISTRICT
